Abstract The aim of this study was to determine the effect of the use of a mobile application on the knowledge of the elderly about COVID-19. The study was conducted with 100 elderly people aged 60 and over. The study was conducted in two phases. In the first phase, the knowledge of the elderly about COVID-19 was determined. In the second phase, the effect of the use of a mobile application on the knowledge of the elderly about COVID-19 was determined. The results of the study showed that the use of a mobile application significantly increased the knowledge of the elderly about COVID-19. The study concluded that the use of a mobile application is an effective way to increase the knowledge of the elderly about COVID-19.

favore applicative e non la mera attivazione di soluzioni adatte ad essere trasmesse, per istanto data 20/06/2016 e tenendo conto che la stessa è stata precedentemente rilasciata.
